On Your Side®

Welcome to **Farm Insurance Update**, our Agency's electronic farm insurance newsletter. Today's farms require specialized insurance expertise and our agency is here to deliver. We're proud to offer AgriChoice® policy protection for the property and liability needs of your farm. Its customizable program can be tailored to meet the needs of your specific operation, from large commercial farms to the hobby farm.

Preventing Chemical Theft – Spring planting season is just around the corner. The cost of herbicides and pesticides has been on the rise and now is the time to take a few precautions to prevent theft. Make sure chemical storage buildings are well lit and easily visible. Never store chemicals long term. If you are purchasing now for use later in the spring, consider asking your dealer to store them for you. Always keep chemical storage buildings locked and secure. If you use anhydrous ammonia, be aware that it can be used as an ingredient in the manufacture of methamphetamines and has become a target for thieves and/or drug users. You may want to take precautions by locking access valves to prevent your tanks from being targeted.

Planning for Economic Volatility – With higher input costs, tighter credit, and commodity prices leveling off, everyone is feeling the pinch of today's economic volatility. If it has been awhile since you have had your farm insurance program reviewed, you may want to give us a call. We can review your deductibles, valuations and coverage selections to be sure that you are making the best use of your premium dollars. While everyone likes to save money, no one wants to be surprised at a time of loss.

☐ Call us for a **FREE** copy of the *Customer's Buying Guide to Farm Insurance* or a **FREE** review of your insurance needs.
